NOTE: The certified St. Gallen Deposit types shall exclusively be equipped with the high security locks according to EN 1300 listed both in the approved technical documentation and in the lock guide ECB•S R01.

The types of the series St. Gallen Deposit have a weight of $\leq 1,000$ kg. In accordance with the technical documentation, they therefore must be equipped with an anchoring assembly including material.

The certification is only valid when used as a "deposit safe" and for the deposits documented during the test. Deposit trapping attacks are only part of a night safe certification.

Only the system for depositing the keys is certified according to EN 1143-2:2014.

The marking as ECB•S certified product, in compliance with this certificate, is only allowed with an original ECB•S certification mark as proof of conformity according to ISO/IEC 17065.
